

# CHEMBRITE AB

Stainless Steel Cleaner & Brightener

## DESCRIPTION

Got a carwash bay that is repulsive and detracting from business? If so, this is your answer. This product will help restore that new look and bring business back. It is a concentrated product containing hydrofluoric acid and sulfuric acid designed for cleaning and brightening aluminum, stainless steel and the dirtiest carwash bays. When used as a wheel cleaner it is second to none. Consult before use.

## USAGE INSTRUCTIONS

Handle With Care! When used as a bay/equipment cleaner for regular maintenance begin at 50:1. Try in a small spot before attempting larger areas. For brightening aluminum use with extreme care. Use at 30-50:1. Apply in a small spot to test potency. Strengthen if necessary. For cleaning and brightening aluminum wheels, do not apply to dry hot wheels. Begin application at 120-150:1 (16-20 drops). Always wear proper PPE when using this product. Consult sales representative before use.
